

A new Academy is being erected just north of Lumberton in a beautiful pecan orchard given by Bass Pecan Company to be administered by the Alabama-Mississippi Conference of Seventh-Day Adventists — a full 12-grade school for the young people of all sections. To open in September, 1961, the Academy is dedicated to the principles we feel our business has always represented: Growing, Producing, Beautifying, Inspiring.

We are very proud that the Church which will administer and operate the school has chosen to name it the BASS MEMORIAL ACADEMY. Just as healthy, growing trees and plants bring beauty and enrichment to all, so do healthy, growing young people. We are pleased to be a part of this outstanding development which will mean so much not only to our immediate area, but to the entire country.

For further information write directly to
Bass Memorial Academy, P. O. Box 191, Lumberton, Mississippi

DESIRABLE

MISSISSIPPI GIANT (Mahan)

STUART

America's Favorite Pecan

These three varieties of Pecans are our Choice for you. We find each of these to have excellent qualities. The STUART is the leading commercial variety, being hardy, even in size of pecans, heavy producer. The DESIRABLE is a variety which is early blooming, fast-growing, bearing well throughout the South. The MISSISSIPPI GIANT (Mahan) is the largest of the papershell pecans and with its large foliage and excellent shape it makes an ideal tree for home planting. Beautify your home with trees; and at the same time add production to your yard by making your trees pecans, between which are planted blooming and productive fruit trees!

PECAN GIFT BOXES

From November through Christmas we package and mail our finest papershell pecans to all parts of the world. A special greeting card will be enclosed for the entire Holiday Season — Just tell us how to sign your gift card and when you wish the gift to arrive — before Thanksgiving or Christmas — and your gift problems are over.

Prices:

5 lb. box	\$ 3.50 postpaid
10 lb. box	6.00 postpaid
50 lb. sack	25.00 prepaid
100 lb. sack	45.00 prepaid

Quotations will gladly be made on larger orders for our choice selected Papershell Pecans. We can also quote postage and express rates to all parts of the globe if necessary.

PLANT FRUIT TREES, TOO!

WITH YOUR BASS PECAN TREES INCREASE YOUR HOME'S VALUE THROUGH THE YEARS

Southern home-owners can grow wonderful fruit in their yards. Fruit trees are highly ornamental, and they are also highly practical. What can be more beautiful than pear, peach, plum, apple trees in full bloom and filling the air with a fragrance beyond compare? We offer only those varieties of fruit trees which are most successfully grown in the South, and which are the easiest to care for and keep in healthy and productive condition. Read about the various types of trees below each colorful illustration. Imagine growing fruit like this on your own trees!

PEARS

↙ *The South's Finest Fruit Tree*

The ORIENT pear variety was developed by the United States Department of Agriculture and the University of Tennessee in a most successful attempt to create a pear with good eating qualities, resistant to blight and other diseases, and highly productive. We can furnish in a Medium size, Large size, and Extra Special size.

KIEFFER: The well-known variety which is highly blight-resistant, and recommended particularly as a pollinator with the wonderful ORIENT trees. Available in Small and Medium sizes only.

PINEAPPLE pears were grown by us for our own use many years, and then developed for our customers. Very heavy producers, they are blightproof, and one mature tree may produce 40 or more bushels! An excellent preserving pear, these trees grow rapidly, are very early blooming pears. Available in Small, Medium, Large, and Extra Special sizes.

DELICIOUS APPLES

We offer Red Delicious and Golden Delicious apple trees, and no other varieties have ever gained such popularity in so many sections of the country. Especially for home plantings, we have saved back some of these and have what we call Super Special trees — bearing in the nursery. Ideal for your yard.

CONCORD *The Best Grape*

Who doesn't like grapes? We offer the variety we have found best suited to Southern soils and climate, the Concord. Everyone should have a grape arbor.

OUR SELECTION OF PEACHES

WE HAVE GROWN MANY THOUSANDS OF BUSHELS OF PEACHES IN OUR ORCHARDS HERE AT LUMBERTON. THE THREE KINDS WE OFFER HAVE DONE BEST OF MANY KINDS TRIED HERE. PLANT THESE VARIETIES FOR A WIDE RANGE OF TIME IN WHICH TO ENJOY PEACHES FROM YOUR YARD.

↗ RED HAVEN: The earliest fine peach we know. Very early bearer, fast grower. Yellow-meated under red skin, clear-seed when fully ripe. Ripens early June.

↗ HILEY BELLE: Very rapid grower, prolific bearer. Creamy white flesh. Freestone. Ripens late June.

↗ ELBERTA: Large yellow with red cheeks. Best known peach. Freestone. Ripens July.

CELESTE FIGS

↗ Fig trees require little or no cultivation. They should be planted in a protected area if possible, and mulched well their first growing year. We have grown many varieties of fine figs, but think the CELESTE the very best of all. It is one of the hardiest types, and is very desirable for canning and preserving, and also as a fresh fruit with cereal or for fruit compotes or ice creams. The Celeste fig is small to medium in size, pear-shaped, ribbed, with firm, sweet, juicy flesh.

PERSIMMONS

↖ Can be grown wherever native persimmons are grown. Exotic and magnificent foliage and fruit make this a *must* for your yard. Large golden fruit, ripening early fall.

PLUMS

↖ We have our plum trees grown for us, to be of the very finest quality money can buy. Plum trees are nicely shaped and ornamental, and produce heavily. Ideal both for eating and jellies.

HOW TO PLANT YOUR TREES

BASS trees come ready to plant, and will not require any additional pruning. Never allow roots to dry out, but wet roots as soon as you can, and if not ready to set out at once dig a trench and put roots in and cover well. Use water when planting trees; when hole is about three-fourths filled with earth, fill with water, let water soak in, and then finish filling with earth. Plant trees to the same depth they stood in the nursery; you can tell easily by the color of the bark. Have a large hole for your trees, a little larger than the roots would require. Do not bend the roots. Keep ground around trees cultivated all summer, and never let grass or weeds grow too near to take up moisture and nourishment. Frequent shallow cultivation is recommended. Do not put fertilizer in the hole, but put this out around on top of the soil out from the tree, and work in well. Do not put any tile down to water or feed trees, as this lets air down to dry the soil.

No pruning is necessary after trees branch high enough above ground.

SPECIAL

We like to wrap the trunks of newly planted trees. SPIRAL WRAP is a kraft paper wrap which is fine to use on the bodies of the trees the first year. Begin at the point where you wish branches to begin or where the trees are branched, and wrap spirally down to the ground. Tie in two or three places to hold the Spiral Wrap up. Leave on until fall following planting. Protects against sun sca'd, frost and cold, ravages of rabbits and field mice and adult boring insects. Only \$1.00 the roll, 155 lineal feet, 4 inches wide.

Grafts (scions) or buds 5¢ each. No less than 50 sold. Grafting wax \$1.00 the pound.

Be sure to inspect trees on arrival and be sure to get an inspection report if any should be damaged in transit to you.
